

# Subject Index

**A**djacency, 154, 155, 157, 160, 164,  
172, 199, 200

proto- 157, 165

spel-, 160-162, 164, 165, 167, 168

tight spel-, 164, 165

adjacent, 170-172, 174-176, 178, 179

Alexandroff space, 174-176, 179

Alexandrov topology, 64, 65, 73, 78,  
80-82, 91

algebra operator, 304, 309

algebraic mapping, 210, 211, 214-219

$(\alpha, M)$ -compact, 22, 29, 30

$(\alpha, M)$ -pseudocompact, 22, 26, 27, 29,  
30

automatic continuity, 296, 303

**B**aire category, 1-5, 9, 11, 14, 59  
 $\kappa$ -, 1, 2

Banach algebra 346, 347

Banach-Saks property, weak, 304-307,  
308

base, 114-119, 277

countable, 71, 72, 271, 279, 283

neighborhood, 72, 75, 259, 339-342

point-finite, 71

$\sigma$ -disjoint, 71

$\sigma$ -locally finite, 70

$\sigma$ -point-bounded, 70, 71

$\sigma$ -point-finite, 76

$\theta$ -, 68, 69

basic proximities, 132-135, 138, 141

binary picture, 154, 163, 165-167

Bohr compactification, 290, 292

boundary, 154, 155, 157, 159, 163,  
165-169

boundary set, 210, 211, 213, 219, 220,  
223, 225

bounded, 41-44, 49, 248-258, 349,  
350

countably, 41, 43-45

para-, 41-47

**C**AD/CAM, 198, 199, 205

Cantor cube, 276

cardinal function, 50-52, 62

category, 122, 123, 126

**Prox**, 122, 123

**ProxG**, 122, 123, 130

sub-, Cpt, 123

sub-, CptG, 122

**Top**, 122, 123

**TopG**, 129

Cayley graph, 210-219, 221-223, 225,  
226

Čech closure operator, 132-134, 137

Čech-analytic space, 324, 325

closure space, 50, 52, 54-57

closure systems, 1, 2, 6, 8

coalescence, 269, 271, 274, 275

compact, 143, 152

compact set, 262, 265

compatible proximities, 132, 135

complete space

Aronszajn, 114-116, 118, 119

Čech, 114, 118

Čech, quasi-developable, 117

quasi-developable, 114, 119, 120

quasi-metric, 116, 118

quasi-metrizable, 119, 120

Tychonoff, quasi-developable space,  
117

computational geometry, 198, 201

computer graphics, 170

computer graphics (screen), 154, 155

computer science, 198, 199, 208

cone, 330, 332, 333, 335-338

connected, 74, 75, 143, 147, 174-176,  
178-182

arc-wise, 147

locally arc-wise, 147

locally, 147

connectedness, 154-156, 158-161

coset space, 262, 267

covering space, 210, 211, 214-218,  
226

universal, 216, 217

**D**ecomposition property, 330-32

digital  $n$ -space, 174, 177

digital topology, 154-156, 160, 164,  
169, 170, 172

dimension, 170, 171  
 dimension (Alexandroff), 174, 177  
 discrete grid, 156, 157  
 discrete grid (grid points), 154  
 discrete subring, 339, 341, 344, 345  
 domain, 78, 80, 81, 90, 94  
   Scott, 81, 88  
 $D^{\mathbb{Z}}$ , 276  
 dual ideal, 32, 38  
 dual lattice, 38  
 dual pair, 346–349  
 Dugundji space, 262, 263, 267, 268  
 Dunford-Pettis property, 304–306, 308  
 dyadic space, 276–278, 283

***e***-compact, 41–46  
*e*-countably compact, 41–46  
*e*-Lindelöf, 41, 45, 46  
*e*-paracompact, 41–48  
*EP*-system, 11  
 Euclidean *n*-space, 284  
 Euclidean space, 289  
 exchange property, 1, 2, 6, 11

***f***-proximities, 132, 133, 136, 142  
 fragmented space, 324–326  
 $\sigma$ -, 324–328  
*F*-transcendental, 316–322  
 functor, 122, 123, 130

**G**elfand function, 346, 347  
 graph, 170–172  
 grill, 132, 133, 135, 136, 142  
   *f*-, 137  
 grill operator, 132, 136, 137  
 group  
   Abelian, 227, 231, 232, 237–239,  
     242–245, 247  
   compact, 276–279, 283  
   compact connected, 227–236  
   Lie, 227–233, 235, 236  
   locally compact, 248–250, 253, 255–  
     257, 261, 279, 282, 283, 304,  
     306, 309  
   locally compact Abelian, 290–293  
   locally pseudocompact, 249, 250,  
     252, 260

  pro-Weyl, 227, 228, 235, 236  
   pseudocompact, 248, 249, 256, 258–  
     261  
   weakly locally compact, 248, 256,  
     260  
   Weyl, 227, 228, 235, 236, 310, 311  
 group action graph, 210–219

**H**ypercontinuous, 32, 36, 38–40

**I**deal, 41–44, 48, 49  
 imbeddings, 276, 283  
 independent set, 290–293  
 interconnection network, 210, 211,  
   213, 220, 226  
 involution, 310–315  
 $I^{\mathbb{Z}}$ , 276, 277

**J**ordan curve, 154, 159  
 Jordan *n*-surface (digital), 174, 178  
 Jordan surface, 154

**K**adeč norm, 324, 326, 327, 329  
 $\kappa$ -structure, 50–54, 56–59, 62  
 Khalimsky line, 174, 175, 177

**L**attice  
   bounded distributive, 32, 33, 35, 36,  
     38, 39  
   complete distributive, 132–136, 138  
 locally connected, 143  
 locally finite space, 174, 175, 177

**M**aximal protorus, 227, 229–236  
 maximal torus, 227, 229–233  
 measure  
   regular Borel, 346, 348  
 metric, 183–189, 193, 195, 196, 284–  
   286, 288  
 metrization, 50–52, 61, 62  
   Harley-Faulkner, theorem, 61  
 minimal discrete flow, 269, 271, 274,  
   275  
 molecular space, 170, 172  
 multidimensional data, 154, 155

**N**eighborhood (nbhd) lattice, 96, 99–102, 105–107, 109, 112, 113  
 convergence in, 109  
 dual, 102, 103  
 induced, 97, 100, 104–108, 110  
 pre-, 101, 106, 109–111  
 $T^1$ -, 96, 111

non-*RK*-minimal, 29  
 normal space, 290, 291, 293, 294  
 normalizer, 227, 230, 235

**O**mega-structure, 50, 52, 53, 58, 59, 61

one-parameter subgroup, 284, 285, 289  
 ordered space, 17  
   topological, 16  
   uniform, 16, 17

Ostrowski net, 316, 317–323

**P**artial metric, 64, 76, 183, 184, 186–196

partial order, 183–186, 188, 192, 195, 196

path, 179

path (digital), 174, 176, 181

*p*-bound, 22–24, 26

*p*-embedding, 122, 124–127, 129

perfect mapping, 41

poset of prime filters, 32, 33

Priestley topology, 32–36, 38, 39

product topology, 276, 284, 314  
   non-, 285

proper automorphism, 269–272, 274

proper dense pseudocompact subgroup, 237–239, 242–247

proximal adjunction space, 122, 123, 125–127

proximal transformation group, 122, 123, 129–131

proximal ultrafilters, 122, 124, 125

proximity space, 50, 51, 56, 63

  basic, 50, 56–58

  weak, 56, 57

pseudocompact field, 339, 345

pseudo-convergence, radius of, 316, 320, 322

pseudo-convergent, 316

pullback, 122, 123, 128, 129

pushout, 122, 123, 126, 127

**Q**uasi, 39, 43

quasi-continuous poset, 32, 78, 85–88  
   bi-, 33, 39, 40

  non- 92, 93

quasi-developable, 64, 65, 68, 69, 71, 76

quasi-developable space, 76, 115

quasi-metric, 64, 183, 185, 186, 190–195, 197

quasi-metric space, 114, 115, 116

quasi-metrizable space, 118

quasi-uniformity, 16, 17, 19–21

  Pervin's, 16, 18–21

**$\mathcal{R}_C$**  set, 339–341

realcompact field, 339, 345

realcompactification, 296, 301

regular, 41–43, 45, 46, 49

*e*-, 42, 44, 45

*I*-, 41, 42, 44

regular set, 174, 180, 181

regular space, 42

repletion, 296, 301

*RK*-minimal, 22, 25, 26

  non-, 30

Rudin order, 22, 24

Rudin-Keisler order, 22, 30, 31

**S**cattered space, 304, 307, 308

Scott topology 32, 34, 38, 39, 82

  bi-, 34, 39

separable, 143, 152, 307

separating map, 296–299

separation axiom, 143, 144

set theory

  combinatorial, 50, 62

Shimrat's space, 143, 144

$\sigma$ -point-bounded base, 64

Smirnov compactification, 122, 123, 131

spectral set, 32–36, 38, 39, 78–81, 84, 86, 87, 90–93

spectral topology, 78, 84, 88, 91, 92

*src* set, 339

Stone space, 32, 38–40

subcompact space, 114

surface, 154–163, 166, 168

Jordan, 155, 159–161, 168

near-Jordan, 158–160

systems of sets 1, 2, 4, 6, 11

**T**hin set, 262–264

topological group, 26, 31, 262–265,  
267, 268, 276, 277, 279, 280,  
283

pseudocompact, 237, 241

topological ring, 310, 315

compact, 310, 314

topology, 96–100, 104, 106, 107, 108,  
110, 114, 198–208, 269

totally bounded topology, 290, 291

totally disconnected, 143, 147–149

Tychonoff cube, 276

maps onto, 276, 277

Tychonoff space, 118

**V**ector norm, 330–332, 336–338

**W**avefront computation, 210, 211,  
220–223, 225, 226

weak, 60, 305

base, 8, 9

weak topology, 290, 293, 304, 346

weakly first countable space, 50, 52,  
58–61

weightable quasi-metric, 64–73, 75, 76

**Z**-embedding, 290, 291, 293, 294

0-dimensional, 143, 151

zero set

proximal, 122, 124, 125, 127, 128
